- Apply via email: hr@ycharch.com

### WHO IS YCHA?

37-year old established architectural practice with projects and commissions largely within the Charlotte, NC and upstate SC region. The work of the firm is extremely diverse and provides an opportunity for young, talented designers to participate in the development of complex projects that require creativity, passion, and thoroughness. YCHA consistently competes with larger firms in Charlotte and other surrounding areas for complex projects. Our firm was recently awarded a large, multi-year contract with a nationally-known client and needs immediate assistance.

As a smaller practice, a tremendous opportunity exists for an individual who wishes to learn, collaborate, experience, and be a part of something greater.

### WHAT CAN WE OFFER YOU?

- Daily collaboration with experienced and creative Architects and other design professionals.
- We provide an opportunity for you to become a leader and responsible collaborator with the design team.
- We offer competitive compensation and financially reward all individuals within the practice who demonstrate commitment of personal and professional achievement. It is our expectation and goal to financially reward "overachievers."
- YCHA provides competitive benefits for all team members, including Insurance, vacation, sick leave, profit sharing, and maximum profit distribution as allowed under IRS-allowed Safe Harbor Plan.
- All work and no play does not necessarily help an Architect. Therefore, we try to be sensitive to each individual's personality, interest, and diversity to allow for a balance between professional and personal time.
- We will financially assist in the areas of professional development and organizations.

### OUR EXPECTATIONS OF YOU

- Master's in Architecture preferred
- Proficient with Revit as a production tool
- Proficient with AutoCad as a production tool
- Proficient with 3-D visualization and modeling software, i.e., SketchUp, Rhino, Enscape, Lumion
- Experience with Adobe Suite is a plus
- Solid design and production skills and a meticulous attention to detail
- Motivated self-starter that works well in a collaborative environment and maintains desire to learn
